

The **new** generation of flow meters In Touch with the Future

Safety is our Concern

You can count on Lutz.

Precise work counts more than ever in laboratories as well as in production and fluids handling. Flow measurement must therefore be efficient, economical and, above all, practical – in mobile application as well as in stationary operation.

Precise capture of fluid data ensures quality work processes and economical handling of operating resources.

For nearly 20 years, experts have relied on tried-and-true Lutz flow meters – and the new generation of meters will inspire you.

- **TR turbine wheel meter**
- **TS nutating disc meter**
- **HDO oval gear meter**

product video

TR Series

- ✓ Can be combined with all drum and container pumps
- ✓ Wide measuring range
- ✓ Also for small volume flow
- ✓ Sub totals can be reset

(see pages 10-11)

TS Series

- ✓ Touch screen display
- ✓ Multilingual menus
- ✓ Simple plain-text operation
- ✓ Plug & play modular design

(see pages 12, 14, 15, 16)

HDO Series

- ✓ Touch screen display
- ✓ Multilingual menus
- ✓ Simple plain-text operation
- ✓ Plug & play modular design
- ✓ For high flowrates, temperatures and pressures

(see pages 13, 17, 18, 19)

Flexible to use. A wide array of possibilities:

- Food, gourmet and beverage industry
- Chemical industry
- Petrochemicals
- Chemicals and mineral oils
- Machine shops and metal working
- Automotive industry and suppliers
- Electroplating and surface treatment
- Paint and varnish industry
- Pharmaceuticals and cosmetics
- Plant and apparatus construction
- Engineering and design

There are a lot of measuring devices for fluids.
But the advantages of the new Lutz flow meters stand out from them all.
Their precision, flexibility and user-friendliness will win you over.

Discover the pluses of innovative Lutz technology:

- + Touch screen display
- + Multilingual menus
- + Simple plain-text operation
- + Integrated help function
- + High precision through overrun correction and characteristic adjustment
- + Safety and monitoring functions
- + Simple system connection
- + Plug & play modular design

Scan for
product video

Outstanding user-friendliness.

The first flow meter with a **touch screen display** and backlighting will convince you with its simple requirements-oriented display and usability, multilingual interface and compact design.

With **plain-text instructions, system reports and help texts**, as well as **monitoring functions**, its user controls practically eliminate errors. Manual operation is just as possible as external control.

■ In Touch with the Future.

Simply easy to use: Flow measurement with volume preselection.

The relay module – an intelligent cornerstone of Lutz meter innovation – helps you automate work processes and organize more efficiently.

The desired volume can simply be preselected and started with the touch of a button. Whether for mobile use with a drum pump or for controlling complex systems: With easy volume preselection, your processes will be simpler and safer. The pump, the system and/or the solenoid valve are turned on and off by the integrated electronics.

■ **Precise, safe and economical.**

Combine to your needs. Easy to assemble.

The Lutz flow meter can be connected to your system quickly and with no wiring work, using socket connections that can't be confused. The new connection system is assembled like a modular design, allowing individual modules, such as the basic meter, control unit and relay module, to be combined with each other and installed.

The flexible meter system you can rely on.

- Simple installation and start-up
- External controls and data evaluation
through standard interfaces
- Modules can be installed separately by location
- Always the best technical and financial solution
- Short maintenance times

Lutz Flow Meter Program

The Reasonable: Lutz flow meter TR

Easy handling

Easy handling, compact built and a quick assemble to all drum and container pumps:
The Lutz flow meter TR in PP or.

A manageable meter which you can count on in all situations. This flow meter measures accurately thin-bodied, non-inflammable liquids.

A quick and reliable measurement:

How it works

The flowing liquid causes the turbine to rotate thereby it accurately measures the pulses. The measured values are transmitted and processed electronically as a result. Thereupon the digital in front of display shows the sub total and the total volume.

- 1 Housing top (PP or PVDF)
- 2 PCB
- 3 Keypad foil
- 4 Magnet
- 5 Radial turbine wheel (PP or PVDF)
- 6 Measuring chamber (PP or PVDF)

The economical liquid volume measurement

The choice is yours

Lutz offers complete pumping systems for the laboratory and research sector. The pump set Lutz B2 Vario can be optionally equipped with a flow meter TR90-PP (Order No. 0213-031).

PP for neutral and aggressive liquids

such as glycol, ferric (III) chloride, hydrochloric acid, phosphoric acid, etc.

PVDF for highly aggressive fluids

such as chlorine solution, nitric acid, sulphuric acid, etc.

*Test assembly: Medium water, 0.66 ft inlet runs and outlet runs

Lutz Flow Meter Program

TS Series: Nutating disc principle

Product Features

The flow meters in plastic or metal version are nutating disc types and are suitable for the transfer of neutral, aggressive, flammable and viscous liquids.

- Wide application range
- Available in PU version

Take control: TS operates so

The liquid streaming causes a nutating disc to gyrate about its own axis. A multi-pole solenoid is made to rotate via a driver and switches a reed contact through the housing cover.

The volume flowing through is determined from the number of pulses.

- 1 Measuring chamber
- 2 Magnet
- 3 Nutating disc

Lutz Flow Meter Program

HDO Series: Oval gear principle

Product Features

The flow meters in plastic or metal version are oval gear types and are suitable for the transfer of thin bodied to highly viscous liquids.

- For high flow volumes, temperatures and pressures
- Few components and wearing parts
- Low pressure loss in the plant

This is the way the HDO operates

Two oval gears interlocked and displaced by 90° in the meter housing are rotated by the flowing fluid. By means of the two oval gears a defined fluid volume „in portions" is transported. The magnets placed on the rotors are also rotated. A reed contact fitted outside of the measuring chamber records the magnetic impulses produced. The volume of the flowing fluid is determined by the number of impulses recorded.

- 1 Oval gears
- 2 Permanent magnets
- 3 Reed contact

Flow measurement without volume preselection - TS

for non flammable liquids

Flow meter type VA10 in physiologically safe version (PU). The flow meters are mainly used in the food-, cosmetics- and pharmaceutical industry. Additional costs see price list.

Combination made to measure

Advantages of the Lutz flow meters:

For mounting on drum and container pumps, fittings with screw thread, measuring cell protected from impurities by an integrated strainer, optional non-return valve, integrated control unit, either direct input or presettable delivery rate, large LCD for easy reading, even at a distance, control unit can be rotated in 90° steps in any direction, volume unit simple to set, additional operating mode display, display of the total delivery rate, flow velocity display, optional liquid level function, easy battery replacement.

Application 1

Flow meter with drum pump

The liquid is pumped from one container to another. The explosion proof meter system is installed directly on the drum pump.

- 1 Drum pump connection
- 4 Non return valve

Application 2

Remote control

The liquid is pumped from one container to another. The two containers are a long distance apart or in separate rooms. The control unit is secured to the hose at the nozzle. The pulses are transmitted by means of the protective cover through data line to display unit.

- 1 Drum pump connection
- 4 Non return valve
- 21 Data cable
- 22 Protection cover
- 26 Hose bracket for control unit

Combination made to measure

Advantages of the Lutz relay module:

Simple, reliable plug connection between the measuring element and the control unit, easily assembled, ready to use immediately, integrated in the meter assembly to save space, simultaneous control of the pump motor and the solenoid valve, system protected by fault detection function.

Application 3 Batch control system with presettable delivery rate and solenoid valve

The liquid is pumped at a preset read amount. Both the pump motor and solenoid valve are activated by the relay module integrated in the batch control system.

- 1 Drum pump connection
- 19 Solenoid valve
- 11 Connecting cable main valve
- 10 Connecting cable motor
- 9 Main supply cable relay module

Application 4 Batch control system with presettable amount for remote operation

With the relay/operating unit located away from the transfer station you are able to operate from your control room avoiding operator to be exposed to toxic fumes from liquid being transferred. Also, the most efficient way to operate 2 or more drum pumps when batching multiple liquids in mixing processes. This option will also extend the life of the electronics in the relay and operating unit when used in a corrosive environment.

For hazardous locations:

Items to the left away from hazardous area could alternatively be installed in an Ex. approved conduit.

- 1 Drum pump connection
- 5 Relay module
- 19 Solenoid valve
- 11 Connecting cable main valve
- 10 Connecting cable motor
- 9 Main supply cable relay module
- 21 Data cable
- 24 Mounting plate

Accessories

for volume preselection

Product detail	Specification	Order-No.
	5 Relay module RM10 Facilitates volume preselection in combination with the appropriate connection cables. 100-120 V, 50-60 Hz	for ST10, SL10, VA10 HDO250, HDO400, HDO500 0230-201
	7 Power supply unit NG10 120V Supplies the control unit with power (instead of batteries). This function is already included in relay modules. 100-120 V, 50-60 Hz	for ST10, SL10, VA10 HDO250, HDO400, HDO500 0230-230
	Communication module allows the communication with external control systems, analog output (0-20mA, 4-20mA, 0-10 V), analog output, RS485 interface, alarm output, Digital input (external start/stop) 8 Communication module KM10K (complete version) with cable protective covering	for ST10, SL10, VA10, HDO250, HDO400, HDO500 0230-101
	9 Power cable relay module 16 ft long 120 V	for RM10, NG10 0211-159
	10 Connecting cable Motor/Slow 1-way 1.6 ft long 120 V	for RM10 0211-158
	11 Connecting cable main valve 16 ft long 120 V	for RM10 and RM30 0211-157
	19 Solenoid valve (Please consult factory)

Miscellaneous installation accessories

Specification	Order-No.	Product detail
21 Data cable Connects the modules in the case of decentralised installation. 14-pole, 16 ft long 14-pole, 32 ft long for ST10, SL10, LM10, UN10, VA10, HDO250, HDO400, HDO500 for ST10, SL10, LM10, UN10, VA10, HDO250, HDO400, HDO500 0230-306 ● 0230-309 ●		
22 Protection cover SH10 with 1 data socket Protects the modules in the case of decentralised installation. for ST10, SL10, LM10, UN10, VA10, HDO250, HDO400, HDO500 0230-350 ●		
22 Protection cover SH20 with 2 data socket Protects the modules in the case of decentralised installation. for ST10, SL10, LM10, UN10, VA10, HDO250, HDO400, HDO500 0230-351 ●		
Pulse converter for a signal amplification, must be mounted on the basic meter if the distance to the next module is more than 16.5 ft		
23 Pulse converter IW10 with 1 data socket for ST10, SL10, VA10, HDO250, HDO400, HDO500 0230-352		
23 Pulse converter IW20 with 2 data socket for ST10, SL10, VA10, HDO250, HDO400, HDO500 0230-353		
24 All-purpose plate For wall-mounting or as a heat protection plate for ST10, SL10, LM10, UN10, VA10, HDO250, HDO400, HDO500 0230-304 ●		
25 Wall bracket set Additional clamp fixing for DIN rails (TS 35) EN 50022 for ST10, SL10, LM10, UN10, VA10, HDO250, HDO400, HDO500 Installation together with all-purpose plate 0230-304. (all-purpose plate not included in wall bracket set) 0230-307 ●		
26 Hose bracket for control unit For decentralised installation of the modules on a hose line. for ST10, SL10, LM10, UN10, VA10, HDO250, HDO400, HDO500 0230-303 ●		

● Suitable for the delivery of combustible and easily inflammable liquids (e.g. ethanol, petrol) and for pumping liquids in potentially explosive environments.

Accessories

Basic meter for decentralised assembly and external data evaluation

Given larger distances between the measuring and control point or installation locations difficult to access in the plant, the individual modules (basic meter, operating unit, relay module, etc.) can be installed in different locations. The data connection between the components is established by data cable and plug connection without awkward and complicated wiring.

For data transmission to an external signal processor (e.g. SPS), a communication module is necessary.

A protective cover and a data line are required for the data network.

Product detail	Specification	Order-No.
	28 Basic meter ST10 (FPM) PPO/PPS/BaFe/FPM	0230-500
	Basic meter SL10 (FPM) PPO/PPS/FPM	0230-510
	Basic meter LM10 (FPM-FEP) PPS/LCP/BaFe/FPM-FEP II 2 G T4	0230-520 ●
	Basic meter UN10 (FPM-FEP) PPS/LCP/FPM-FEP II 2 G T4	0230-530 ●
	28 Basic meter VA10 (FPM-FEP) Stainless steel 1.4571/PTFE/FEP II 2 G T4	0230-540 ●
	28 Basic meter HC10 (FPM-FEP) Hastelloy C 2.4610/PTFE/FEP II 2 G T4	0230-550 ●
	28 Basic meter HDO II 2 G c T4 (Stainless steel/Alu)	on request ●
	With hall effect sensor, 4-20 mA outlet or tri-clamp connection on request	

● Suitable for the delivery of combustible and easily inflammable liquids (e.g. ethanol, petrol) and for pumping liquids in potentially explosive environments.

Flow meter planning made easy

Copy – fill in – fax to your nearest Lutz Distributor

Customer No.: _____ Zipcode/City: _____
Company: _____ Country/State: _____
Name: _____ Phone/Extension: _____
Department: _____ Fax: _____
P.O.Box/Street: _____ E-Mail: _____

1. Which meter execution

- ☐ Turbine wheel meter Series TR
☐ Nutating disc meter Series TS
☐ Oval gear meter Series HDO

2. Which medium

Designation: _____
Chemical formula: _____
Concentration: _____ %
Hazardous duty: ☐ yes ☐ no
Specific gravity: _____ lb/ft³ _____ kg/dm³
Viscosity: cps mPas _____ cps _____ mPas
Pumped fluid temperature: _____ degF _____ °C
Ambient temperature: _____ degF _____ °C
Solid content: ☐ yes ☐ no

Which materials are resistant to the medium according to your own experience? _____

Safety data sheet available? ☐ yes ☐ no

3. Operating conditions

Flow rate: _____ GPM (US) _____ l/min.
Operating pressure: _____ ft. or _____ PSIG
_____ m or _____ bar
Filling quantities/batch sizes: _____ gal (US) _____ Liter

Operating conditions: ☐ Without pre-selection
☐ With pre-selection

If pre-selection, control of:

☐ Pump motor _____ Volt _____ Hz
☐ 2/2 way solenoid valve _____ Volt _____ Hz

4. Installation of the meter

☐ Mounted on the pump
☐ Fitted in-line systems _____ DN(DIN) _____ DN(ANSI)

5. Decentral installation

☐ Handling by PLC
☐ Control unit installed separately (e.g. control cabinet or room)
_____ ft. _____ m
(Distance between control unit and basic meter)

6. Your desires

Here you can describe your cases of application or add remarks:
